

**We are looking  
for one or more  
students.**

Are you excited about  
**robots** and **technology**?  
Is your area of study a  
**nerdy one**? Are you  
domiciled in **Copen-  
hagen** or **environs**?

If you can answer **YES** to the above questions, then a **discipline-relevant student job with Nordic Fos** may be relevant to you. Because we are looking for one or more students to handle our fully automated assembly of environmentally friendly floor-heating systems.

#### **ABOUT THE POSITION**

We are busy at our high-tech assembly facilities in Dragør where we assemble and pack our floor-heating systems. We therefore need additional assistance to look after our new Industri 4.0 industrial robot plant.

#### **WE ARE LOOKING FOR ONE OR MORE STUDENTS FOR THE FOLLOWING PERIODS:**

Monday to Thursday: 1 p.m. to 9 p.m.  
Friday: 1 p.m. to 6 p.m.  
Saturday and Sunday: 9 a.m. to 5 p.m.

You will be working together with our operations manager, Michel Jacobsen, who is responsible for taking home materials, for ensuring that the robots will handle the correct order, and for ensuring that there is room at our warehouse for storing the floor-heating plates and components waiting to be packed and shipped. It is important that you have some technical insight, but – even more important – that you have the drive and is keen on getting to know Nordic Fos and our floor-heating-plate systems and, not least, the robots for which you will be responsible.

#### **GREEN TRANSITION AND SUSTAINABILITY**

Nordic Fos develops and manufactures innovative floor-heating solutions that will underpin the green transition. Our plates have a low entry temperature and a swift reaction time. This means more than 65% energy saving as compared with radiators.

All our development and production focus on sustainability at all stages. All our components are manufactured in Denmark or in one of our neighbouring countries.

We are looking forward to hearing from you. **Send your application to Michel Jakobsen** and please contact Michel if you have any questions:
